SRC provides **complete repair solutions for walk-ins**, including batten strips, replacement doors, thermal liner panels and parts. Each solution is custom manufactured to fit any brand, with a range of finishes and all required components such as wiring, heated sweeps, latches, trims and closures.

Replacement Doors

SRC replacement doors are custom manufactured to fit any brand of walk-in, restoring performance and extending system life. Each door is built to order with finish options to match your application and ensure a proper fit.

Thermal Liner Panels

Thermal liner panels restore the appearance and performance of existing walk-in panels without full replacement.Designed to attach directly to existing surfaces, they help extend the life of your walk-in.

Batten Strips

Batten strips provide a simple solution to restore damaged or worn walk-in panel joints while improving overall appearance. Designed for easy installation, they help reinforce panel seams and extend the life of your existing system.
